

Claims

1. A portable case in which a mirror for reflecting skin is installed in a cover body for opening and closing a case body including a storage part, comprising:

a light source part capable of radiating multiple types of light toward skin to vary the hue of the skin;

a battery for powering the light source part; and

a selector switch for switching the type of the light emitted from the light source part.

2. A portable case according to Claim 1, further comprising:

a light control means for controlling the brightness of the light emitted from the light source part.
